

We were privileged to represent Jacob Anderson concerning the accusation in Waco.

In our combined 70 years of criminal law practice, we have never encountered a case with more misrepresentations concerning what actually occurred.

This incident occurred in February of 2016 at a fraternity social event. There were more than 300 Baylor students in attendance. Mr. Anderson and this girl were seen multiple times during the evening kissing passionately, groping and grinding in the middle of the party. This occurred in close proximity to more than 100 other students. One witness described this girl as "stalking" Mr. Anderson.

Shortly after the incident, this girl was seen by two friends who described her as "calm and controlled" and that she appeared as "if nothing had happened." She also made statements suggesting that what had occurred was consensual.

She later claimed she was "drugged" which is contrary to her blood test results. She also claimed that she was intoxicated to the point of not having control. That would be contrary to her blood alcohol level of .12 which was minimally over the legal limit for driving while intoxicated.

She even stated to the police investigator that she had "given up alcohol for lent" but she was observed to be drinking at another social event earlier that evening. Everything she drank that evening was of her own volition.

For the very first time, this girl claimed in August of 2018 that she had been "choked" and "left for dead." She failed to ever report that to law enforcement or medical personnel who interviewed her the night this purportedly occurred. She never reported those fabrications for 2 ½ years. She is also seen grinning from ear to ear with no evidence of injury in a hospital photograph taken 1 ½ hours after the alleged incident.

There was no DNA evidence linking Mr. Anderson to this incident.

The recent criticism of Judge Strother and the Assistant District Attorney, Ms. LaBorde is complete unfounded based on the facts and the truth.
